

...who will follow you in flight

How about the next generation of aerospace engineers?

Astrophysicists?

Planetary Scientists?

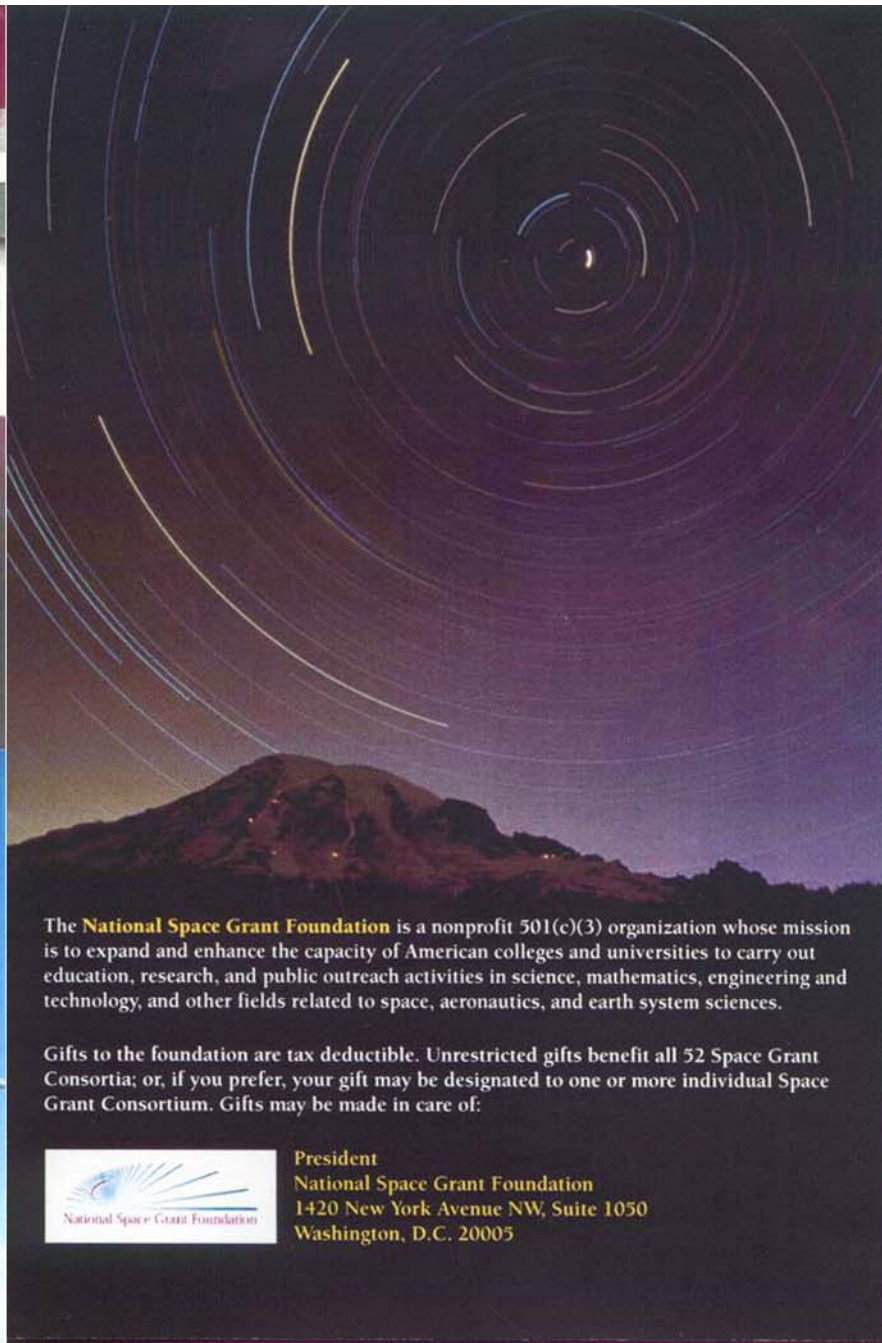

Earth systems scientists?

Who will take young minds and teach them the skills and discipline needed to carry humanity to new worlds in the new millennium?

Who will inspire them with the vision to reach for the stars?

**You had that vision.
You turned it into your life's work.
And we were there to help.**

The **National Space Grant Foundation** is a nonprofit 501(c)(3) organization whose mission is to expand and enhance the capacity of American colleges and universities to carry out education, research, and public outreach activities in science, mathematics, engineering and technology, and other fields related to space, aeronautics, and earth system sciences.

Gifts to the foundation are tax deductible. Unrestricted gifts benefit all 52 Space Grant Consortia; or, if you prefer, your gift may be designated to one or more individual Space Grant Consortium. Gifts may be made in care of:

President
National Space Grant Foundation
1420 New York Avenue NW, Suite 1050
Washington, D.C. 20005

**Now that your career
has taken off...**

Ensuring our future...

The **National Space Grant Foundation** represents 52 programs of the Space Grant Consortium. We fund research and education projects nationwide that help young men and women become young scientists and engineers. We fund outreach programs that turn even younger minds on to the wonders of space and flight, ensuring our future among the stars.

The 52 Space Grant Consortia represent every state, Puerto Rico, and the District of Columbia. Each consortium is made up of colleges, universities, businesses, and other private and public institutions—all working to further aerospace education through

- ★ **Funding scholarships and fellowships** for aerospace students at colleges and universities
- ★ **Providing resources to offer research opportunities** in line with NASA Strategic Enterprises, especially among faculty who have not yet become established researchers
- ★ **Stimulating public interest in aerospace sciences** and lifelong learning through partnerships with educators at all levels, thus increasing public appreciation for the direct and indirect benefits of NASA-sponsored research

*But without your help
these dreams will remain earthbound.
So please take this opportunity to support the
National Space Grant Foundation.
Together we fund the future.*

✂
Yes! I want to support the Space Grant program.

- Contact me about a non-cash gift or bequest**
- Please accept my gift of \$_____**

Please use my tax deductible donation for:

- The national endowment**
- The _____ state endowment**
- Foundation expenses**
- _____ state expenses**
